CIRCULAR DESIGN - REDUCE - REUSE - RECYCLE - WASTE - RESPONSIBLE RESOURCES - REFORESTATION - CRAFTMANSHIP - TRANSPARENCY - EFFICIENT ENERGY - ENVIRONMENTAL AWARENESS - SUSTAINABILITY

Circular since 2006

Founded in Copenhagen in 2006, Mater was created to be the pioneering global brand with sustainability embedded in its core.

From the very beginning the ambition was to inspire a global design audience and engage people into sustainable thinking. Mater combines sustainability and circular production using waste, with timeless design, through collaboration with an external base of well-established and new design talents.

Together we are committed

After years of research for more sustainable ways to create furniture, lighting and objects we now work with a range of production partners with the same ambition as us, creating partnerships for change and supporting the United Nations Sustainable Development Goals.

Together we are committed to searching for new and better ways of making beautiful design - in a responsible way.

Ocean Collection

Villa Copenhagen, Hotel - Copenhagen, Denmark

Our Materials

Every material we use is a tribute to sustainable thinking.

Maters foundation and first pioneering steps towards creating timeless sustainable furniture design started in 2006 - and have since then expanded to a wider palette of upcycled and innovative circular materials continually pushing the boundaries of exploring new materials.

Industrial plastic waste

Most of our industrial plastic waste comes from large danish corporations, such as plastic waste from production of insulin pens from global diabetes leader - Novo Nordisk.

FSC certified wood

All wooden products in our collection have always been made from FSC certified wood. In an FSC-certified forest no more trees than the forest can reproduce are felled, so the exploitation of nature is avoided. FSC ensures fair wages and a fair trading price and gives full tracability from product to forest.

Upcycled mango wood

When the tree ends it's productive life as a fruit tree a new one is automatically planted. Instead of low value usage such as burning it, the wood is upcycled, to provide income for the struggling wood-working craft. All our mango wood is FSC certified.

Coffee shell waste

Coffee shell waste is a bi-product from coffee bean roasting. Together with BK1 Coffee, one of the largest coffee roasteries in Denmark, we use this fibre-based waste for several of our shell chairs.

Discarded fishing nets

Old fishing nets from the ocean are collected, washed, shredded and made into pellets also called 'green plastic'. The ocean waste is used both in our outdoor series and injection moulded chairs.

Spent grain waste

Spent grain waste is a bi-product from the Danish brewery Carlsberg's beer production that we use in several of our new circular products.

Upcycled aluminum

Old pipes, tubes and other aluminum waste is melted and used for several of our sand-casted products. A way of upcycling low-value scrap into beautiful design pieces.

We are committed to

The Sustainable Development Goals

At Mater we align our sustainable values with The United Nations Global Goals for sustainable development - a framework agreed by 193 nations, organized into 17 Sustainable Development Goals to improve our planet and living conditions towards 2023. Today we support eight of them with our collection.

All our lighting is made of materials with sustainable elements - from upcycled aluminum to certified wood. The newest LED technology is embedded in all our lighting as this is the most sustainable source of lighting to help save energy.

Through our code of conduct we make sure that we work towards better standards - safe working conditions, fair wages, fair price and following local environmental standards.

We bring new innovative production techniques into the furniture business, upcycling industrial waste, and by mid 2021 we have invested in a revolutionary circular production facility for large scale production.

Sustainable consumption is about doing better with less. With our circular waste production we support a consumption driven change, the more we sell the more waste we remove.

Using circular and upcycled materials in our design supports a reduction of carbon emissions. An example is the Ocean Collection where one single Ocean Chair demonstrates up to 82% in carbon emission savings compared to virgin plastic.

Both our Ocean and Nova Sea collection is made of discharged fishing nets from the oceans. We are proud that these products contribute to reducing landfill, marine pollution and loss of valuable resources.

All our wooden products are FSC certified. In an FSC-certified forest no more trees than the forest can reproduce are felled, so the exploitation of nature is avoided. FSC insures fair pricing and fair wages as well as fair working conditions.

We work with a range of production partners with the same ambition as Mater - creating partnerships for change. Together we are committed to searching for new and better ways of making timeless design in a responsible way.

Ocean OC2 Collection

Carlsberg Headquarter, Copenhagen, Denmark

Ocean OC2 Bench p. 75 | Ocean OC2 4 pers. Table p. 76 | Ocean OC2 Chair p. 74

Ocean OC2 Collection
Designed by Joergen & Nanna Ditzel

Made from Carlsberg's upcycled beer kegs

The Ocean OC2 Collection is Mater's newest reinterpretation of the Ocean Collection.
OC2 refers to the 2nd edition in the Ocean collection made with upcycled material.
The slats are made from upcycled plastic beer kegs, from one of the leading breweries in
the world, Danish Carlsberg.

Carlsberg's discarded beer kegs, processed in collaboration with Danish partner Re-plastic

One Ocean OC2 Chair seat contains 3 Carlsberg beer kegs

When the beer kegs are emptied after use, they get deflated, granulated and cast into the characteristic green coloured slats of the Ocean OC2 Collection. To produce one Ocean OC2 Chair seat 3 of Carlsbergs plastic beer kegs are used.

From beer kegs to outdoor furniture

Ocean Bench p. 75 | Ocean Chair p. 74
Villa Copenhagen, Hotel - Copenhagen, Denmark

Ocean Collection
Designed by Joergen & Nanna Ditzel

Made from upcycled fishing nets

The Ocean collection was originally designed in 1955 by some of the 20th century's most renowned designers, Joergen and Nanna Ditzel. The design has now been created in ocean plastic waste. The series is characterized by its light structure with repeated slats and metal frames, made and tested for outdoor use. The Ocean collection is designed for disassembly, meaning that the design allows each component in its purest form to upcycle into new production circles.

Fishing nets collected from the Ocean, processed in collaboration with Danish partners Plastix and Letbek Plast.

One Ocean Chair seat saves up to 82 % CO₂ emissions compared to virgin equivalents

In a nod to its materiality, the Ocean collection is largely made from ocean plastic waste, one of the most important issues facing our planet. A new innovative business model motivates fishermen across the world to dispose of their discarded fishing nets.

One single Ocean chair uses 960g of ocean plastic waste.

From ocean waste to outdoor furniture

Old, used and dumped fishing nets are collected

Sent to the first cleaning and processing facility placed in Denmark

Cleaned and shredded old fishing nets are ready for processing into pellets

Processed, fishing nets pellets ready for final stage of injection moulding

The Ocean Chair

Joergen & Nanna Ditzel

Nanna og Joergen Ditzel were born in respectively 1923 and 1921. They meet each other at the Danish School of Arts and Crafts in Copenhagen, where they both were students.

In 1946 they established their own design studio. The period from 1946 to 1961 was very productive for the young couple. After Joergens death in 1961 Nanna continued their joint project alone. Many new things were designed the following years, until her death in 2005.

Nova Sea Chair p. 80
Villa Copenhagen, Hotel - Copenhagen, Denmark

Nova Sea Chair

Designed by ARDE

Made from upcycled fishing nets

Nova Sea Chair designed by ARDE, is characterized by its light silhouette and sleek metal frame, with a seat made from ocean waste plastic, collected from the worlds oceans.

The chair is developed through a collaboration between Mater, ARDE and the exclusive five-star hotel Villa Copenhagen.

Discarded fishing nets made into green plastic pellets

Shell made from 96% upcycled ocean waste plastic

Nova Sea is largely made from ocean plastic waste, one of the most important issues facing our planet. A new innovative business model motivates fishermen across the world to dispose of their discarded fishing nets.

From discarded fishing nets to Nova Sea Chair

Nova Sea Chairs
Conference room at Villa Copenhagen, Hotel - Copenhagen, Denmark

Textile made from upcycled consumer plastic waste

Post-consumer upcycled polyester is made from post-consumer waste such as PET plastic bottles that would otherwise have been incinerated or ended up in landfills. The recycling process results in lower CO2 emissions than the process of making virgin polyester fibres and eliminates the need for new raw materials.

Nova Sea Chair p. 80 | Trumpet Coat Stand p. 105
Meeting room at Villa Copenhagen, Hotel - Copenhagen, Denmark

ARDE

ARDE was founded in 2014 by architect René Hougaard. ARDE make great efforts to create design that drives sustainable change, is functional and has a purpose. By considering the circular lifecycle of design and investigating how new and existing materials can be used and combined, ARDE eliminate what's unnecessary to identify the essential.

News
by Space Copenhagen

Made from FSC certified wood

The Space Copenhagen Collection for Mater is a versatile collection of contemporary Danish design with classic roots. It expresses a poetic modernism that harmonizes with the main driving force behind the overall design approach of Space Copenhagen.

FSC Certified wood

Every time we harvest a tree, a new one is planted

All wood in our collection is labeled and produced in FSC(TM) certified wood. When producing furniture from FSC certified wood we support well-managed forestry. In an FSC-certified forest no more trees than the forest can reproduce are felled, so the exploitation of nature is avoided. FSC ensures fair wages and a fair trading price and gives full tracability. We can trace a chair back to the forest where the tree was planted.

All our wooden products are FSC certified

2014: High Stool achieves pioneering FSC certification approved forests benefits our environment, our climate, the wild life and plantation

2009: Launch of High Stool by Space Copenhagen

In an FSC-certified forest no more trees than the forest can reproduce are felled, so the exploitation of nature is avoided

In 2007 Space Copenhagen starts adding new designs to the existing collection

The Dining Chair

The Dining Chair

The Dining Chair with a generously rounded backrest, all made from sustainable sourced wood, is a beautifully sculptured chair inspired by High Stool. The dining chair's smooth curved backrest outweighs the need for armrests. The backrest itself is upholstered in soft durable leather and is fully supportive and comfortable which make it perfect for dining occasions.

The Dining Chair p. 84

Accent Dining Table in Black

The Accent Dining Table is handcrafted in solid FSC oak wood, with a light silhouette of dedicated craftsmanship. It is available in two sizes, Ø110 and Ø140 cm and comes in three different colours; Natural, Sirka Grey and the new Black edition.

Accent Dining Table p. 91

The Lounge Chair

The Lounge Chair, designed by Space Copenhagen, is a classic, sculptural and archetypal piece of furniture built on The Dining Chair's and High Stool's character. The backrest and seat are larger and generously rounded with organic smooth curves and slightly sloped for a heightened sense of comfort. The seat and backrest are upholstered in a soft, durable leather and are fully supportive and comfortable.

The Lounge Chair p. 84

High Stool Backrest

High Stool with a new backrest - hence the name High Stool Backrest builds on High Stool's minimalistic aesthetics and organic character, which is regarded as a New Danish Classic. A generously rounded backrest for a heightened sense of comfort is added.

Space Copenhagen

Space Copenhagen, established in 2005 by Signe Bindslev Henriksen and Peter Bundgaard Rützou. Space Copenhagen is a design studio working across multiple disciplines from furniture, lighting and refined objects, to art installations, art direction and interior design for private homes, hotels and restaurants all over the world.

Earth Stool Backrest - Mask Edition p. 81

Earth Stool & Earth Stool Backrest

Designed by Eva Harlou

Made from upcycled industrial waste

Earth Stool and Earth Stool Backrest is the result of a new innovative waste-to-value technique developed by Mater, that enables us to upcycle companies' industrial waste. The seats are made of plastic waste from the global leader in diabetes care, Novo Nordisk' production of insulin pens. The plastic waste from Novo Nordisk is mixed with coffeebean shells from BKI coffee - one of Denmark's largest coffee manufacturers or with waste from Carlsberg's beer production – the spent grain.

In collaboration with Carlsberg, Novo Nordisk & BKI Coffee

The technique is developed by Mater in collaboration with Danish Technological Institute with support from University of Copenhagen. The waste materials are mixed in a unique composite suitable for press moulding – a method designed to upcycle industrial waste from large global companies in a new way. The end result is a new recyclable composite that is completely new in its materiality, durability and strength.

Earth Stool Backrest - Coffee Edition p. 81 | Earth Stool Coffee Edition p. 81

Earth Stool Backrest - Mask Edition p. 81

The Earth Stool seat is made from upcycled plastic waste from production of insulin pens mixed with beer fibre waste, thus creating a completely new innovative material finish.

One seat contains waste from 30 litres of beer production

Mater created the bar stool from a residual product from Carlsberg's beer production, the spent grain (Danish 'mask'), which is a wet fibre-based mass that is dried and mixed with granulate of plastic waste in a unique mixture that enables press molding.

From beer waste to Earth Stool

Earth Stool Backrest - Coffee Edition p.81

The Earth Stool seat is made from upcycled plastic waste from production of insulin pens mixed with coffee shell fibre waste, thus creating a completely new innovative material finish.

A mix of coffee shells & plastic waste from Novo Nordisk

Earth Stool represents classic Scandinavian design with steel frames that make the bar stool elegant and timeless. The new ground-breaking production technique allows Mater to upcycle waste materials and turn it into useful and unique design solutions.

From coffee shells to Earth Stool

Mask Stool - Natural Edition p. 80 | Ray Pendant, Medium - Black p. 99

Mask Stool

Designed by Eva Harlou

Made from upcycled industrial waste

Mask Stool is the result of a new innovative waste-to-value technique that enables Mater to upcycle companies' industrial waste. The seat is made of plastic waste from the global leader in diabetes care, Novo Nordisk' production of insulin pens. The plastic waste from Novo Nordisk is mixed with spent grain, a bi-product from Carlsberg's beer production.

'Mask' is the Danish word for the spent grain, hence the name of the stool.

Mask Stool seat is made from upcycled plastic waste from production of insulin pens mixed with beer fibre waste, thus creating a completely new innovative material finish.

One seat contains waste from 30 litres of beer production

The new ground-breaking production technique allows Mater to upcycle waste materials and turn it into useful and unique design solutions. *"Carlsberg is always looking for new solutions that can make our products better and our production more sustainable. Mater has succeeded in using our spent grain from beer production in a new way. Normally the mask is used for animal feed, but Mater has succeeded with a new method where the spent grain is mixed with upcycled plastic to create furniture. It is in our spirit to always try to do it better."*

- Tenna Skov Thorsted, Sustainability Manager at Carlsberg Denmark
