CRAFTING
BEAUTIFUL
surfaces

Pintark
IS POSSIBILITIES.

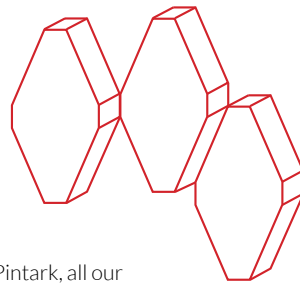

An architectural solutions brand specialising in advanced surface treatment and crafted material application.

Created for interiors and furniture application, Pintark's product and techniques are available in multiple combinations of materials and finishes.

Applied over numerous suggested tiles, blocks and weaves, Pintark's adaptable system creates personal distinction in every surface.

Inherent to Pintark's bespoke solutions is the brand's ability to offer crafted distinction.

Alongside an evolving portfolio of materials and finishes, and the brand's dedication to creating refined surfaces, Pintark offers a complete service delivering bespoke design and a range of traditional crafting techniques. Enhancing textural complexity and visual experience.

At Pintark, all our product & techniques are developed and produced in-house, giving the brand full control over the product it offers

Pintark

PATTERNS.

At Pintark we believe in innovating the use of our products.

Our in-house patterns are all-in-one design solutions that can be used as is or personalised with tailored material and finish selections.

Pintark patterns employ our tiles, blocks and weaves, aimed at offering customers a broad range of ready made designs that are suited to a range of interiors and styles.

perus.

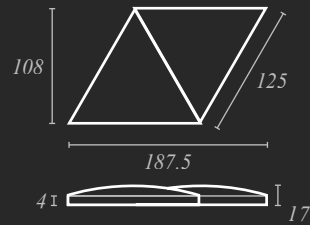

*patterns comprising of
a single tile or block*

Perus surfaces are discreet in style - using classic compositions layered with an additional technique or made distinct through the use of material and finish.

A range of component sizes allows for the composition to be scaled up or down, offering an adaptable system that can create an extensive range of compositions and surface designs.

Perus surfaces are ideal for enhancement of feature interior elements such as doors, headboards, ceilings, wardrobes and cabinetry.

isa.

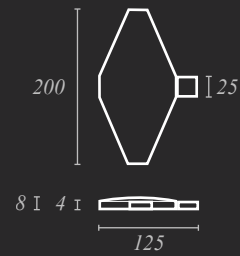

*patterns creating
continuous surfaces*

Aimed at offering customers continuous surface solutions, Isa surfaces are in-house designs that are developed and fully assembled to bespoke sizing.

Isa surfaces enjoy the use of techniques such as weaving to create softer, layered, surfaces that are best suited for large coverages.

Ideal for interior features such as feature walls, large format shutters and doors, partitions and free standing screens.

Pintark

SYSTEMS.

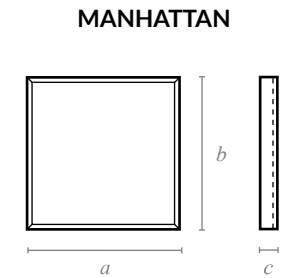

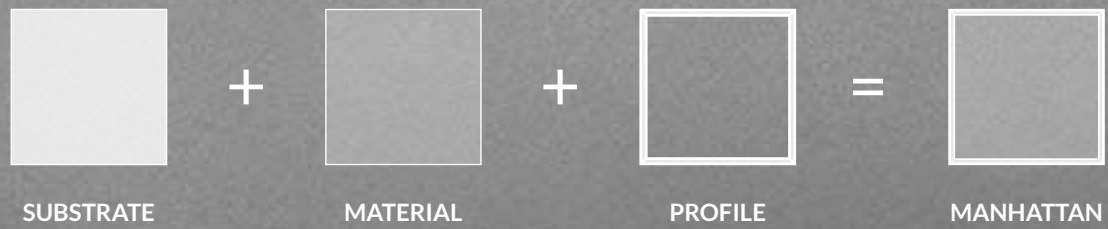

Striving to create forward thinking systems of application and to offer the most innovative solutions, Pintark develops adaptable surface systems that aim to provide flexibility in application.

manhattan.

An advanced surface treatment, adapted as value addition on existing surfaces or employed to create new surfaces - highlighting unique materials with crisp minimal detailing.

Ranging from traditional materials such as leathers and veneers to new age materials such as carbon fibres and stain-resistant fabrics, the system offers infinite possibilities for walls, doors, partitions and furniture features.

Simple dowel installation liberates from size constraints and base finish limitations.

DISCLAIMER.

Component sizes may vary ± 1 mm.

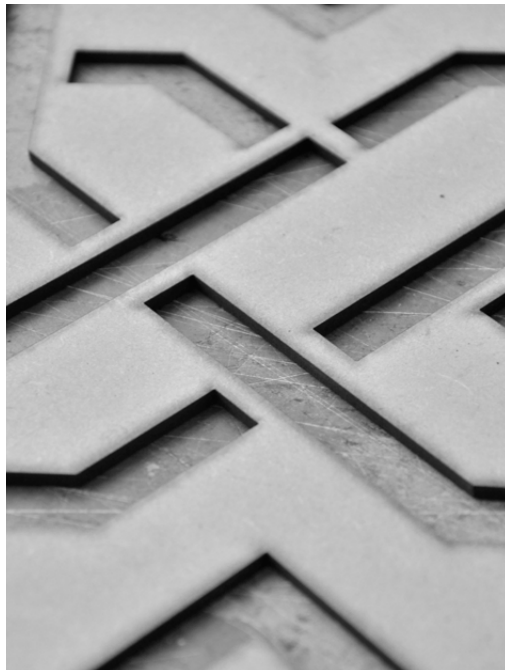

Junctions between metal and adjacent components may experience a gap of up to 0.5 mm.

Metal is a natural material which is directly affected by its environment. Our metal finishes are coated to provide a protective layer, however due to metal's natural properties and depending on the environment, metal finishes may experience patination which in certain circumstances can be seen as desirable.

Leather is a natural material, colour and texture tends to vary from lot to lot and hide to hide.

Depending on component design and size, padding depths range from 7 mm to 28 mm.

Please refer to Pintark Installation Manual for all mounting options.

Pintark

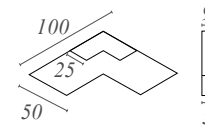

GRAPHIC
INSTALLATIONS.

Pintark's graphic installations are personalised or bespoke compositions inspired by standard components.

Our services extend to working with designated installation teams to ensure a complete and successful application of our product.

Pintark

ARTWERKS.

Pintark's Artwerks service provides clients with a complete package that delivers bespoke designs from concept to realisation.

We work with architects, developers, designers and end clients such as hoteliers, to create bespoke designs for specific application.

citylights

for Crypton, Las Vegas, US

Pintark's brief from Crypton was to devise a way to present their new collection of cutting edge textile solutions in a manner that brought out their intrinsic beauty and qualities of colour and textured surface.

Using the new fabrics and employing Pintark's techniques in sculptural surfacing, Pintark together with Crypton chose a 'wall' to bring these concepts together.

The walls were a means to create a spatially interactive experience connecting viewers to the fabric's technology of durability, versatility and touchability.

**Crypton was awarded
the best product presentation
of HD EXPO 2014, Las Vegas.**

kaeisol

for Pintark

Kaeisol brings to life surface and visual complexity.

A transitional motif creates a soft, crafted surface that celebrates coming together of matte and lustre finishes in a durable tactile form.

The artwork moves from flat to ornate three dimensional form, employing engraved surfacing and material layering.

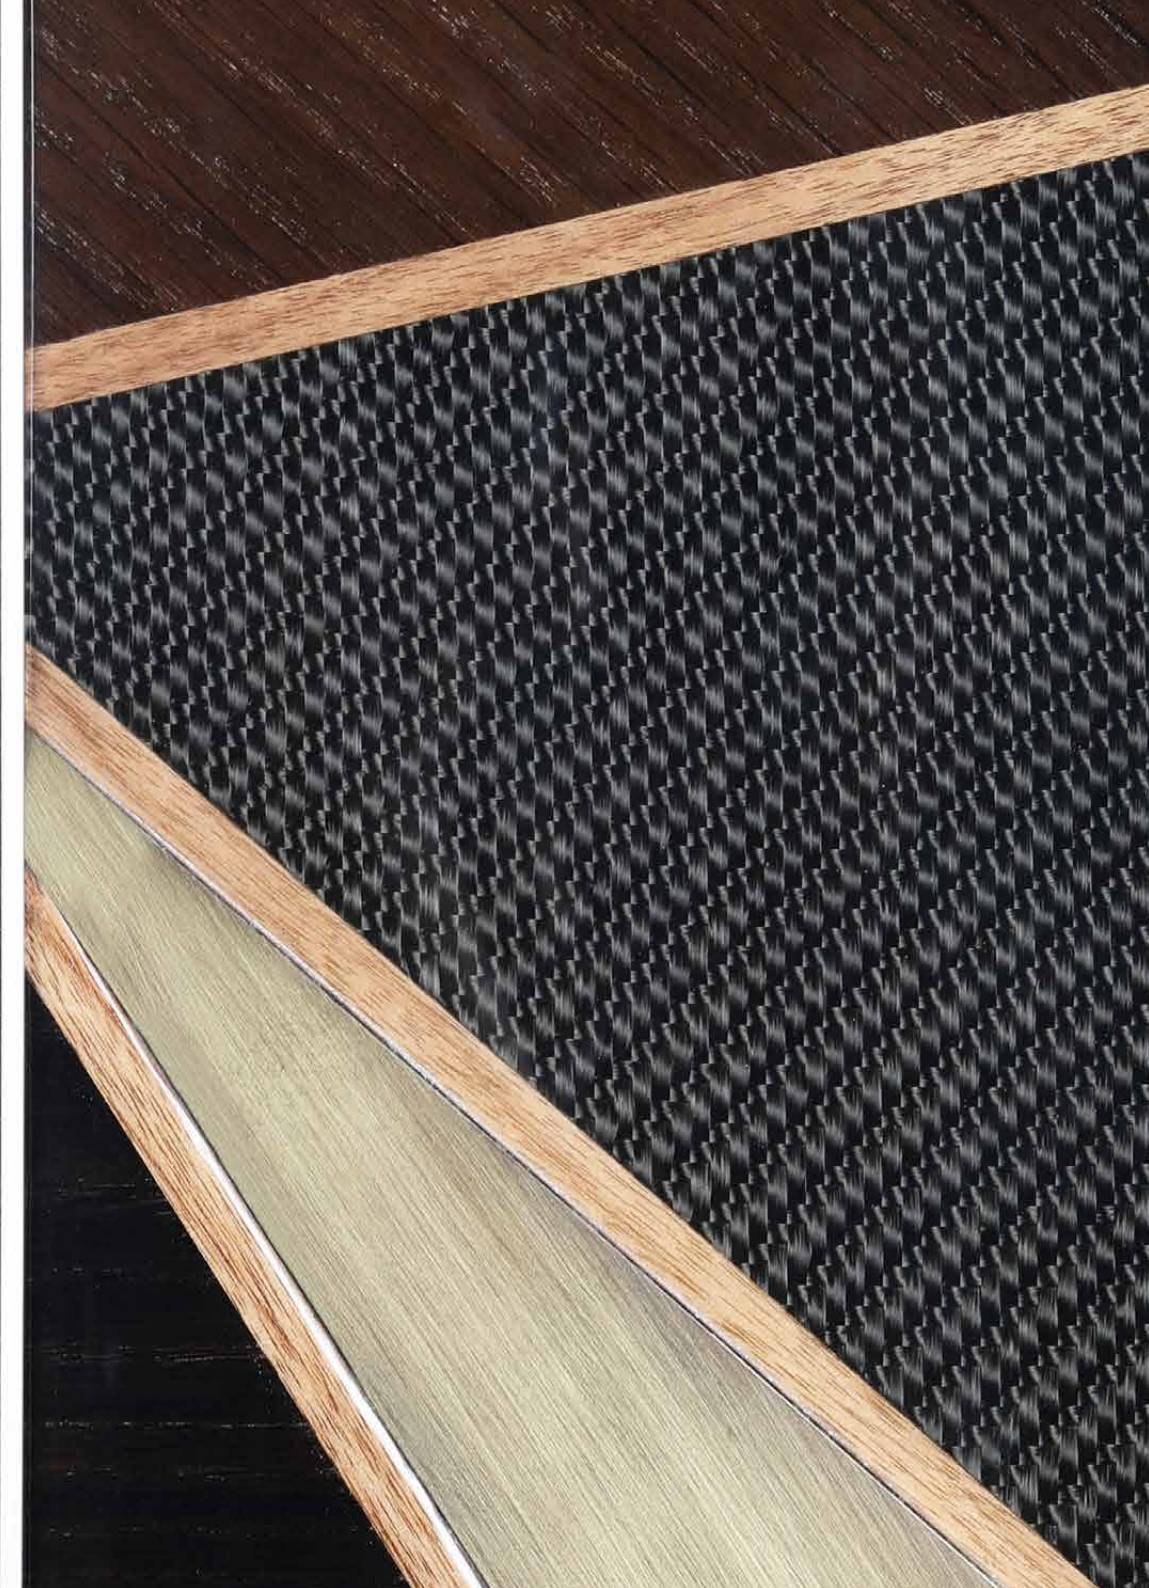

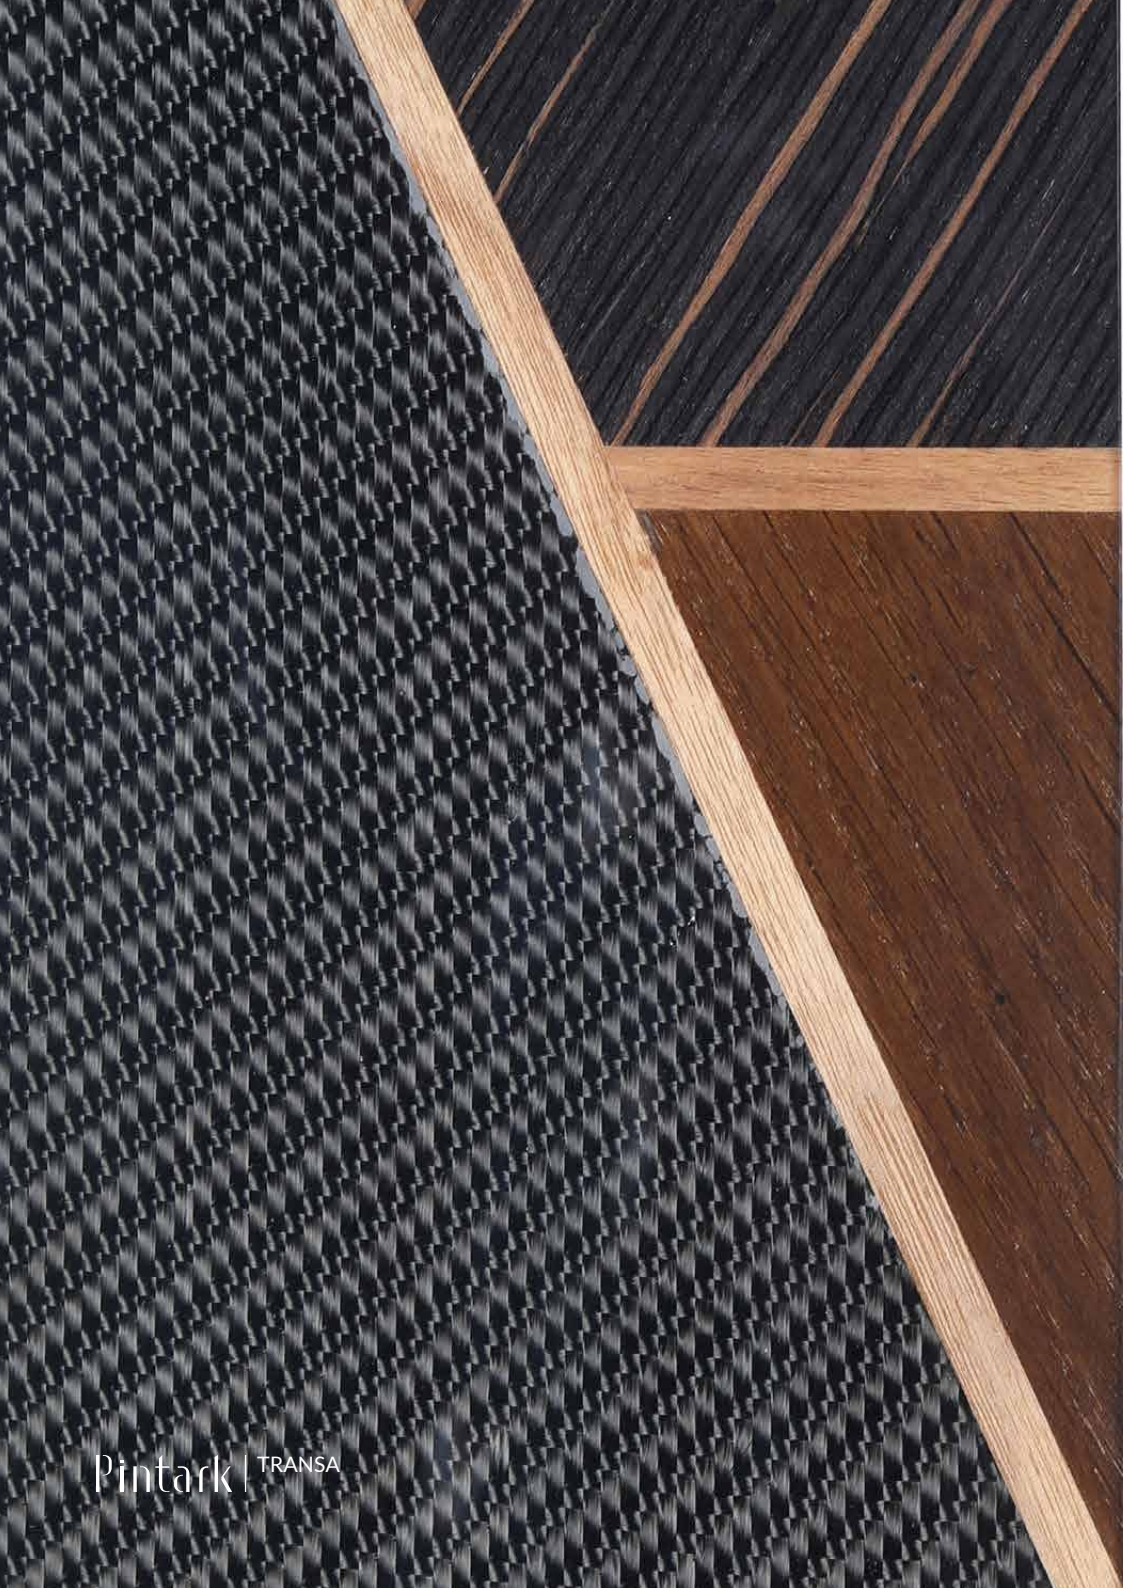

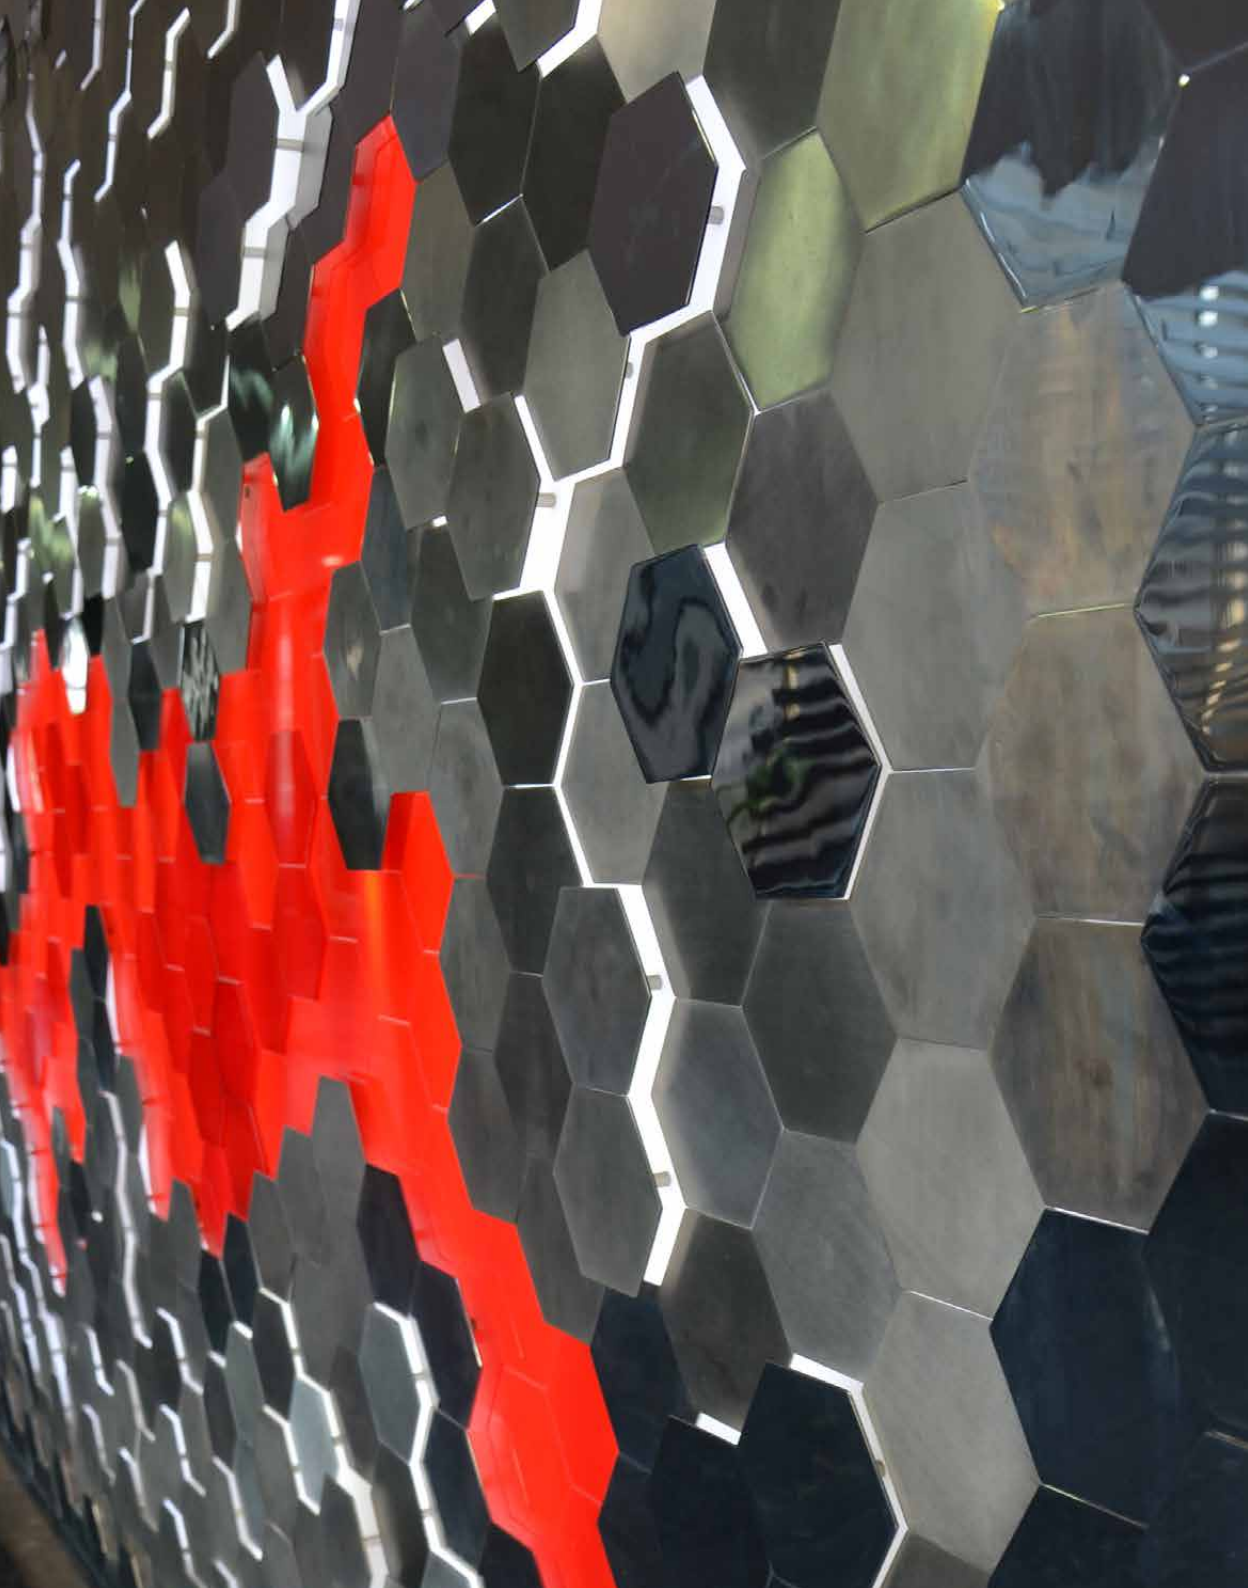

transa

for Pintark

Employing traditional and cutting edge materials, TRANSA is a wall mounted Artwerk that modernises the 'wall panel'. It celebrates material in visual form through the composition of material and detail.

Pintark

TEXTILE
ARTWERKS.

Pintark extends its collaboration with Toucan Krafte to introduce a series of textile artwerks, available as limited edition or commissioned.

Created by hand, each edition is individual, using sourced vintage fabrics. The series employs several hand techniques developed by Toucan Krafte, with each artwerk dedicated to a single technique.

The techniques themselves originating from traditional textile crafts, can be understood as new crafts - creating their own aesthetic and visual identity, from the rigid discipline of Perla to the looseness of Floret, these new crafts resonate with contemporary culture and personality simultaneously.
